

BSRS Meeting

Saturday 10th July
9am to 11:45am

Management of emmetropic presbyopia

- 09:00** - Presbyond - Prof. Dan Reinstein
- 09:20** - Presbymax - Mr Allon Barsam
- 09:40** - Unilateral RLE - Mr Amir Hamid
- 10:00** - Discussion

EDOF IOLs

- 10:20** - Acunex Vario - Dr Florian Kretz
- 10:40** - Alcon Vivity - Mr Fadi Alkherdahji
- 11:00** - B&L Luxsmart - Mr Mayank Nanavaty
- 11:20** - Discussion
- 11:40** - Conclusion of meeting

The BSRS Council are delighted to invite you to the 2021 annual meeting. This is a virtual meeting which will host outstanding international speakers on two fascinating areas of refractive surgery.

Emmetropic presbyopic patients are probably the most challenging group of patients to help. They are also a potentially huge patient population. Our first session will focus on surgical techniques to address this patient group.

Some of the principles discussed in our first session will provide a useful backdrop to our second session on extended depth of focus lens implants. This session is sponsored by three different lens manufacturing companies, each of which has an EDOF lens design. The mechanism of action of these lenses and strategies to maximise successful outcomes will be presented and discussed.

The meeting has been awarded 3 CPD points.

We hope you can join us!
